COTTER PINS & WIRE FORMS

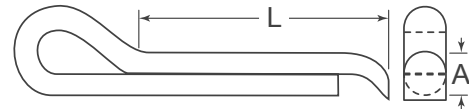

Quality without Compromise

Standard (ASME B18.8.1) & Metric (DIN 94) Cotter Pins

Split pins manufactured from half-round steel wire that are fastened, after passing through a hole, by bending the ends. Cotter pins provide simple, low-cost, yet secure locking between parts.

Hammerlock Cotter Pins

A uniquely designed cotter pin with an extended curved prong. When struck with a hammer the shorter prong moves past the curved prong spreading the tines apart and locking the pin in place. The permanent deformation makes these pins non-reusable.

Additional sizes available upon request for special orders

EASY TO INSTALL

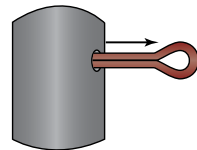

Cotter pins can be installed quickly with no special tools

EASY LOCKING

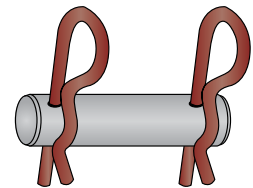

Locks easily in place to provide secure fastening

REUSABLE

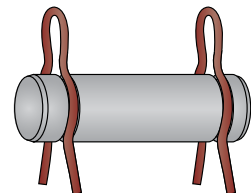

Most cotter pins are easily removed and reused, saving time and money

BRIDGE PINS & HAIR PINS

Bridge pins are installed through a hole drilled in the pin, providing more rigidity in holding power

Hair pins are designed to install externally on a grooved pin for light duty applications

HAMMERLOCK INSTALLATION

Insert pin and strike head

Prongs are forced apart to lock the pin permanently in place

Heritage Industrial

Bridge Pins – Carbon Steel or Stainless Steel

Simple and versatile wire forms used as locking devices. Reusable, cost effective, and easily tethered to prevent loss, they are common mating parts used with clevis pins, hitch pins, and shafts.

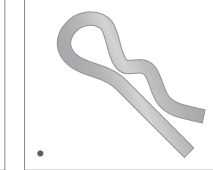

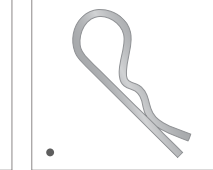

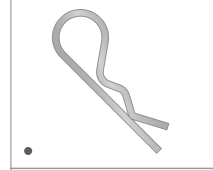

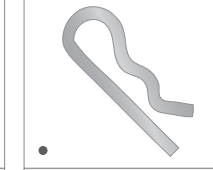

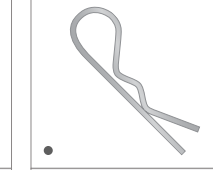

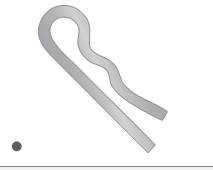

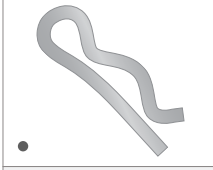

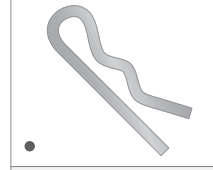

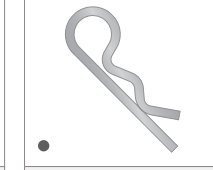

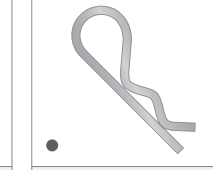

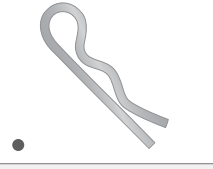

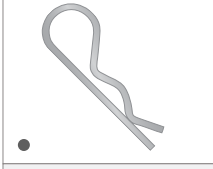

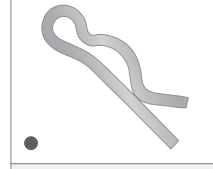

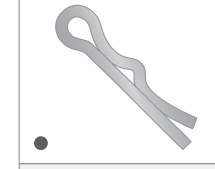

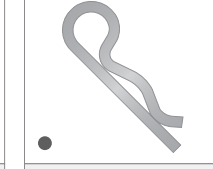

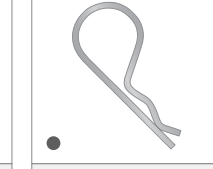

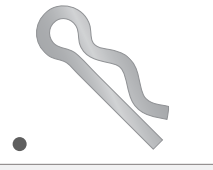

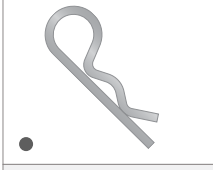

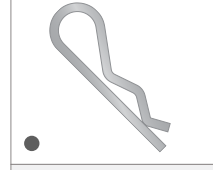

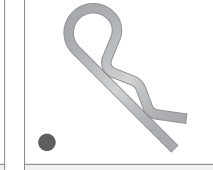

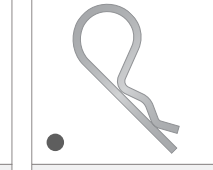

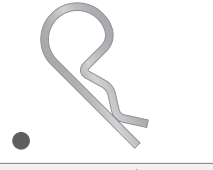

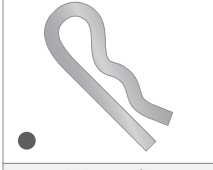

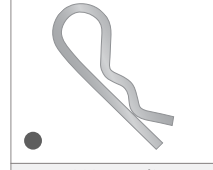

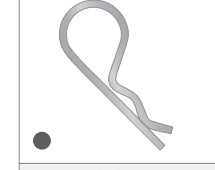

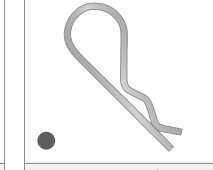

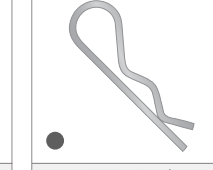

Spring Wire – Zinc Clear – ASTM A227

302/304 Stainless Steel – Plain

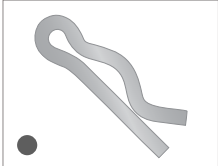

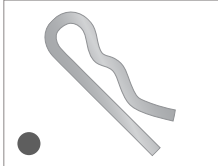

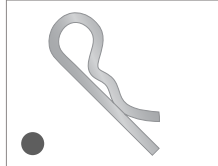

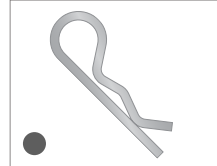

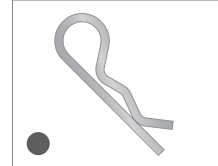

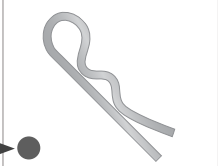

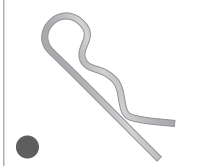

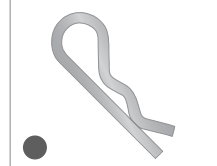

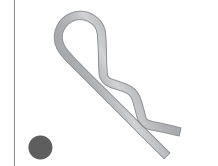

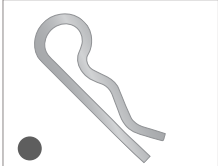

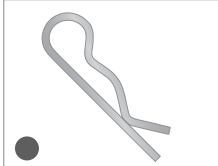

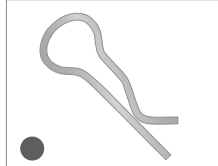

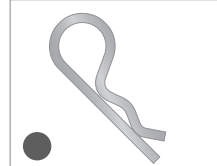

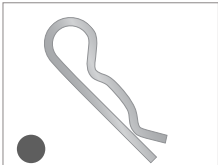

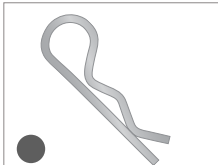

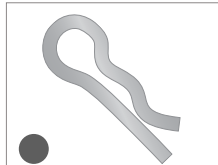

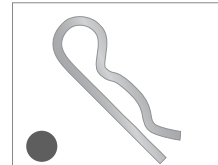

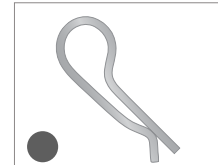

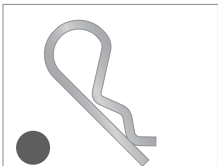

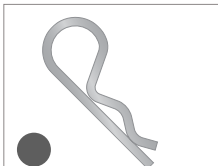

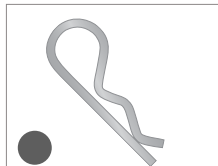

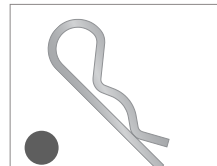

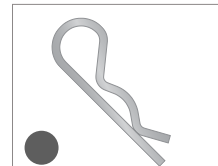

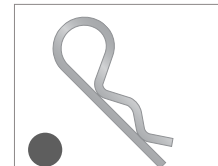

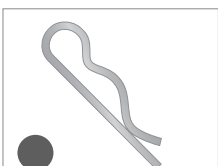

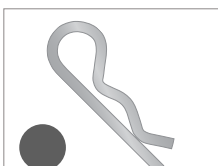

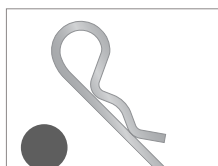

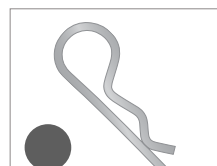

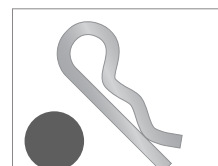

316 Stainless Steel – Plain

Part illustrations are not shown at actual size. Dimensions listed by wire diameter (K) and length (A).

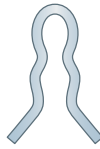

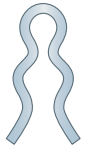

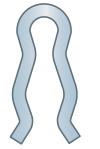

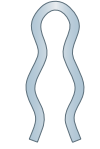

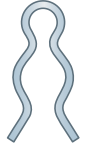

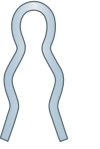

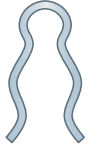

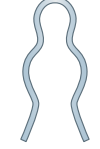

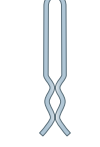

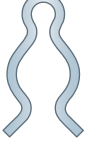

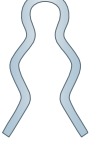

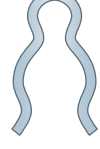

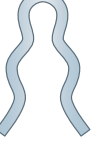

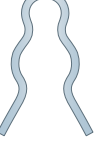

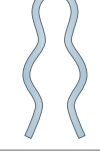

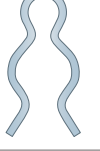

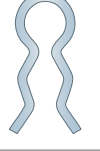

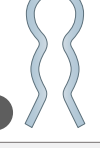

Hair Pins - Zinc Clear

Reusable hair pins feature a high shoulder design for increased surface contact. They fit a wide range of pin diameters and are commonly used on grooved clevis pins, headless pins, and shafts.

Part illustrations are not shown at actual size.
